

# 6 REASONS TO MIGRATE TO SAGE INTACCT CONSTRUCTION

## 100% CLOUD-BASED

Using a native-cloud software with an open API, Sage Intacct Construction allows you to leverage key data from the field, payroll, budgeting, and more to track your key financial data from anywhere at anytime.

## REAL-TIME REPORTING

With Sage Intacct Construction's built-in multi-dimensional reports, you can get real-time insights from dashboards, metrics, and visual analytics to make better decisions—faster.

## POWERFUL FINANCIALS

General Contractors deal with complex contracts and divisions in their projects. Sage Intacct Construction offers consolidated financial and operational reports, intercompany transactions, allocations, shared chart of accounts, and more.

## SEAMLESS INTEGRATION

Typically, there's a lack of communication between multiple software but with Sage Intacct Construction, all your critical business solutions are seamlessly integrated.

## MODERN INTERFACE

Sage Intacct Construction has a modern, easy-to-use, intuitive UX interface.

## TEAM COLLABORATION

With the seamless integration of your estimating, bidding, accounting, construction, field ops, and payroll processes, the collaboration and communication between your back office and on-site teams are enhanced.
