

Information Technology Services

Technology runs your business, it should be reliable.

Making sense of your software, wires, racks and servers can be an intimidating proposition. RKL eSolutions LLC has the experience and knowledge to help you make educated decisions and ensure you are getting the most from your technology investments.

Why Choose RKL eSolutions?

- **Extensive Systems Integration Experience** – You want to pick the company with the most experience and consultants who have been “through it all” with networks of varying sizes and complexity.
- **Vendor Agnostic** – Nearly every vendor has a solution that could work for your company – how do you pick the right one? Having a consulting group that works with all major vendors ensures you can get exactly what you want, not just what is on sale.
- **Understanding** – One piece of your network can impact all the others parts. Our consultants have a deep understanding of many different systems and architectures. We are able to help you find the correct solution, without any of the catches.
- **Solution Driven** – Buying a new piece of technology does not guarantee a working solution. Our consultants look at the big picture and help you implement a solution, not a product.

Technologies we are familiar with:

- Microsoft Active Directory
- Microsoft Exchange & Office 365
- Virtualization with VMware ESXi and Microsoft Hyper-V
- Cisco & Meraki Routers, Switches, Wireless systems
- SAN solutions from EMC, Dell, HP
- Barracuda & Datto Backup Solutions
