

# eBusiness Suite for Sage 500 ERP

eBusiness Suite for Sage 500 ERP provides an intuitive extension to Sage 500 ERP in the form of a browser based solution. This product can empower your customers, salespeople and customer service representatives to increase their efficiency and productivity in order to boost sales. Originally designed as an enhanced replacement to eCustomer and eSalesforce, eBusiness Suite has evolved into a solution that can serve as a B2B and B2C interface as well as a sales team, CSR and remote location alternative interface to Sage 500 ERP.

## B2B and B2C Capabilities

When customers, salespeople and customer service representatives enter your on-line store they have the ability to place orders and get accurate and up to the minute information about items, prices, inventory, account status and expected delivery dates. eBusiness Suite provides the ability to pick, pack, and ship invoices for on-line orders and enables Credit Card processing of payments through integration with the Sage 500 ERP Credit Card module.

eBusiness Suite supports B2C functionality in two ways. A "lite" B2C interface is included that allows for entry of a cart and creation of a Sage 500 ERP customer that must be credit approved prior to shipping. These pages can be enhanced based on client needs. In addition, a custom B2C interface can be connected to Sage 500 ERP using Web Services for Sage 500 ERP which is included in eBusiness Suite.

## Online Access to Account Information

eBusiness Suite can function as a remote interface for Sage 500 ERP. The user can view customer's orders, shipments, invoices, payments and back-order information. It is ideal for salespeople or customer service representatives to see a comprehensive overview of customer accounts in order to respond quickly to customer requests and follow up on orders or payments due. This feature can be utilized at the Customer level, Sales Team, Salesperson or Company depending on user login rights.

## Streamlined Order Entry/Processing and RMA Entry

Choose from multiple interfaces to enter a quote or an order directly into Sage 500 ERP or copy or edit an existing order. Users can filter items by Sales Product Line, Item Category or Item Class during entry. Sales product lines can also be filtered by Login ID to allow for customer specific price lists. To further streamline the process use eBusiness Suite to enter an RMA in Sage 500 ERP and email the customer the RMA packing sheet and label. Autoship functionality enables processing of sales orders and lines through pick/pack/ ship/ invoice upon order creation. Employee Time and Expense entries can be captured against Project Accounting projects.

## eBUSINESS SUITE for Sage 500 ERP

### eBusiness Suite for Sage 500 ERP Benefits:

- Generate revenue with B2B and B2C capabilities.
- Maximize the use of your Sage 500 ERP system utilizing eBusiness Suite for remote user access.
- Improve customer service by providing salespeople and CSR's the tools to access customer information quickly and easily.
- Retain current customers by expanding your customer service options with on-line customer self-service capabilities.
- Increase the efficiency of order entry and processing routines and speed order fulfillment.

# eBusiness Suite for Sage 500 ERP

## Pricing and Inventory Inquiry

- Look up Customer specific pricing on items.
- Access up to date information on Warehouse and Bin quantities.
- Inquire on the history of Serial Number Items.
- Display Item/Inventory Summary History by Inventory Period (SO, PO, IM, etc.) by Company by Warehouse by Customer.
- View item promotions created in Sage 500 ERP Maintain Inventory Pricing.

## Data Import/Export Tools

- Export inquiry information from every inquiry screen to Excel.
