Reasons for Business Intelligence

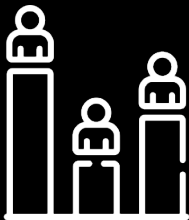

Data is growing at an average rate of 56% per year.

- It is critical for business leaders to cut through the clutter and have access to accurate data and insights needed to make smart, timely decisions

Overcome business uncertainty with relevant, customized reporting

- Challenges with performance visibility, operational silos, financial complexity, and productivity losses all lead to business uncertainty.

Progressive businesses see greater value in sharing insight

- Extending colleague access to data can promote accountability, innovation and high performance

Time and Cost Efficiencies – Customer Reference

Sage 300 Customer: Ignite International Ltd.

Headquarters: Toronto, ON

Industry: Retail

“We’ve gained insight into our inventory holdings that we simply never had before. With stock in multiple warehouses, including third-party providers, it’s crucial that we have visibility across locations, so we know what’s available to ship and when.”

Carrie Magee, VP of Finance, Ignite International, Ltd.

Why SEI:

- Connects all IGNITE’s business data and provides the intuitive self-service tools the business needs for accurate analysis and better decision-making
- Cloud model makes it simple for staff around the globe to log in and access the data they need
- Delivers decision-making data in real time
- Customized reports that empower warehouse and production staff

“Initially we were running reports, exporting to Excel and manually combining and manipulating our data into consolidated statements.

Now that we use Nectari/SEI, we have **streamlined** our financial and sales reporting and have **shed hours off** these processes.

As a result, it has **improved our accuracy** and has allowed **more time** to be spent on more important business needs.”

Monique Gordon
Supervisor of Software Development
Hammond Manufacturing Co. Ltd.
