

On-premises roadblocks vs. Cloud ROI

Real-time financials

Growing businesses rely on real-time financials to compete successfully. Only financial software that's fully cloud-native can provide that.

Reasons to deploy a cloud infrastructure with Sage Intacct Construction

On-premises roadblocks

Challenging remote access and upgrades that feel like reimplementations

Expensive IT costs for software maintenance, upgrades, server maintenance, operating system fixes, and security patches.

Reliance on Excel spreadsheets for reporting and analytics

Poor integration with other systems

Expensive workarounds to connect with other software.

Reduced performance

Performance declines as users and project volume increase.

Higher-than-expected costs

Costs more than just software, maintenance, and support.

Sage Intacct Construction cloud software ROI

Anytime, anywhere access

Unlimited web-based access on any device keeps your project teams working in sync using real time data. Your cloud-native platform will always be on the latest release of the software with automatic quarterly updates – no disruption to business or expensive hardware upgrades. Protect your data with secure automatic backups to SOC1 and SOC2 compliant data centers with disaster recovery.

Real-time reporting, dashboards, and KPIs

Interactive and customizable dashboards improve project reporting and visibility to stakeholders. Multi-entity, multi-location processing supports automated intercompany transactions and allocations, and provides continuously consolidated financial and operational reports without spreadsheets. Have processes you prefer to do in Excel? No problem, Sage Intacct Construction has the flexibility to export reports, dashboards, and list views to Excel as desired.

Modern cloud APIs

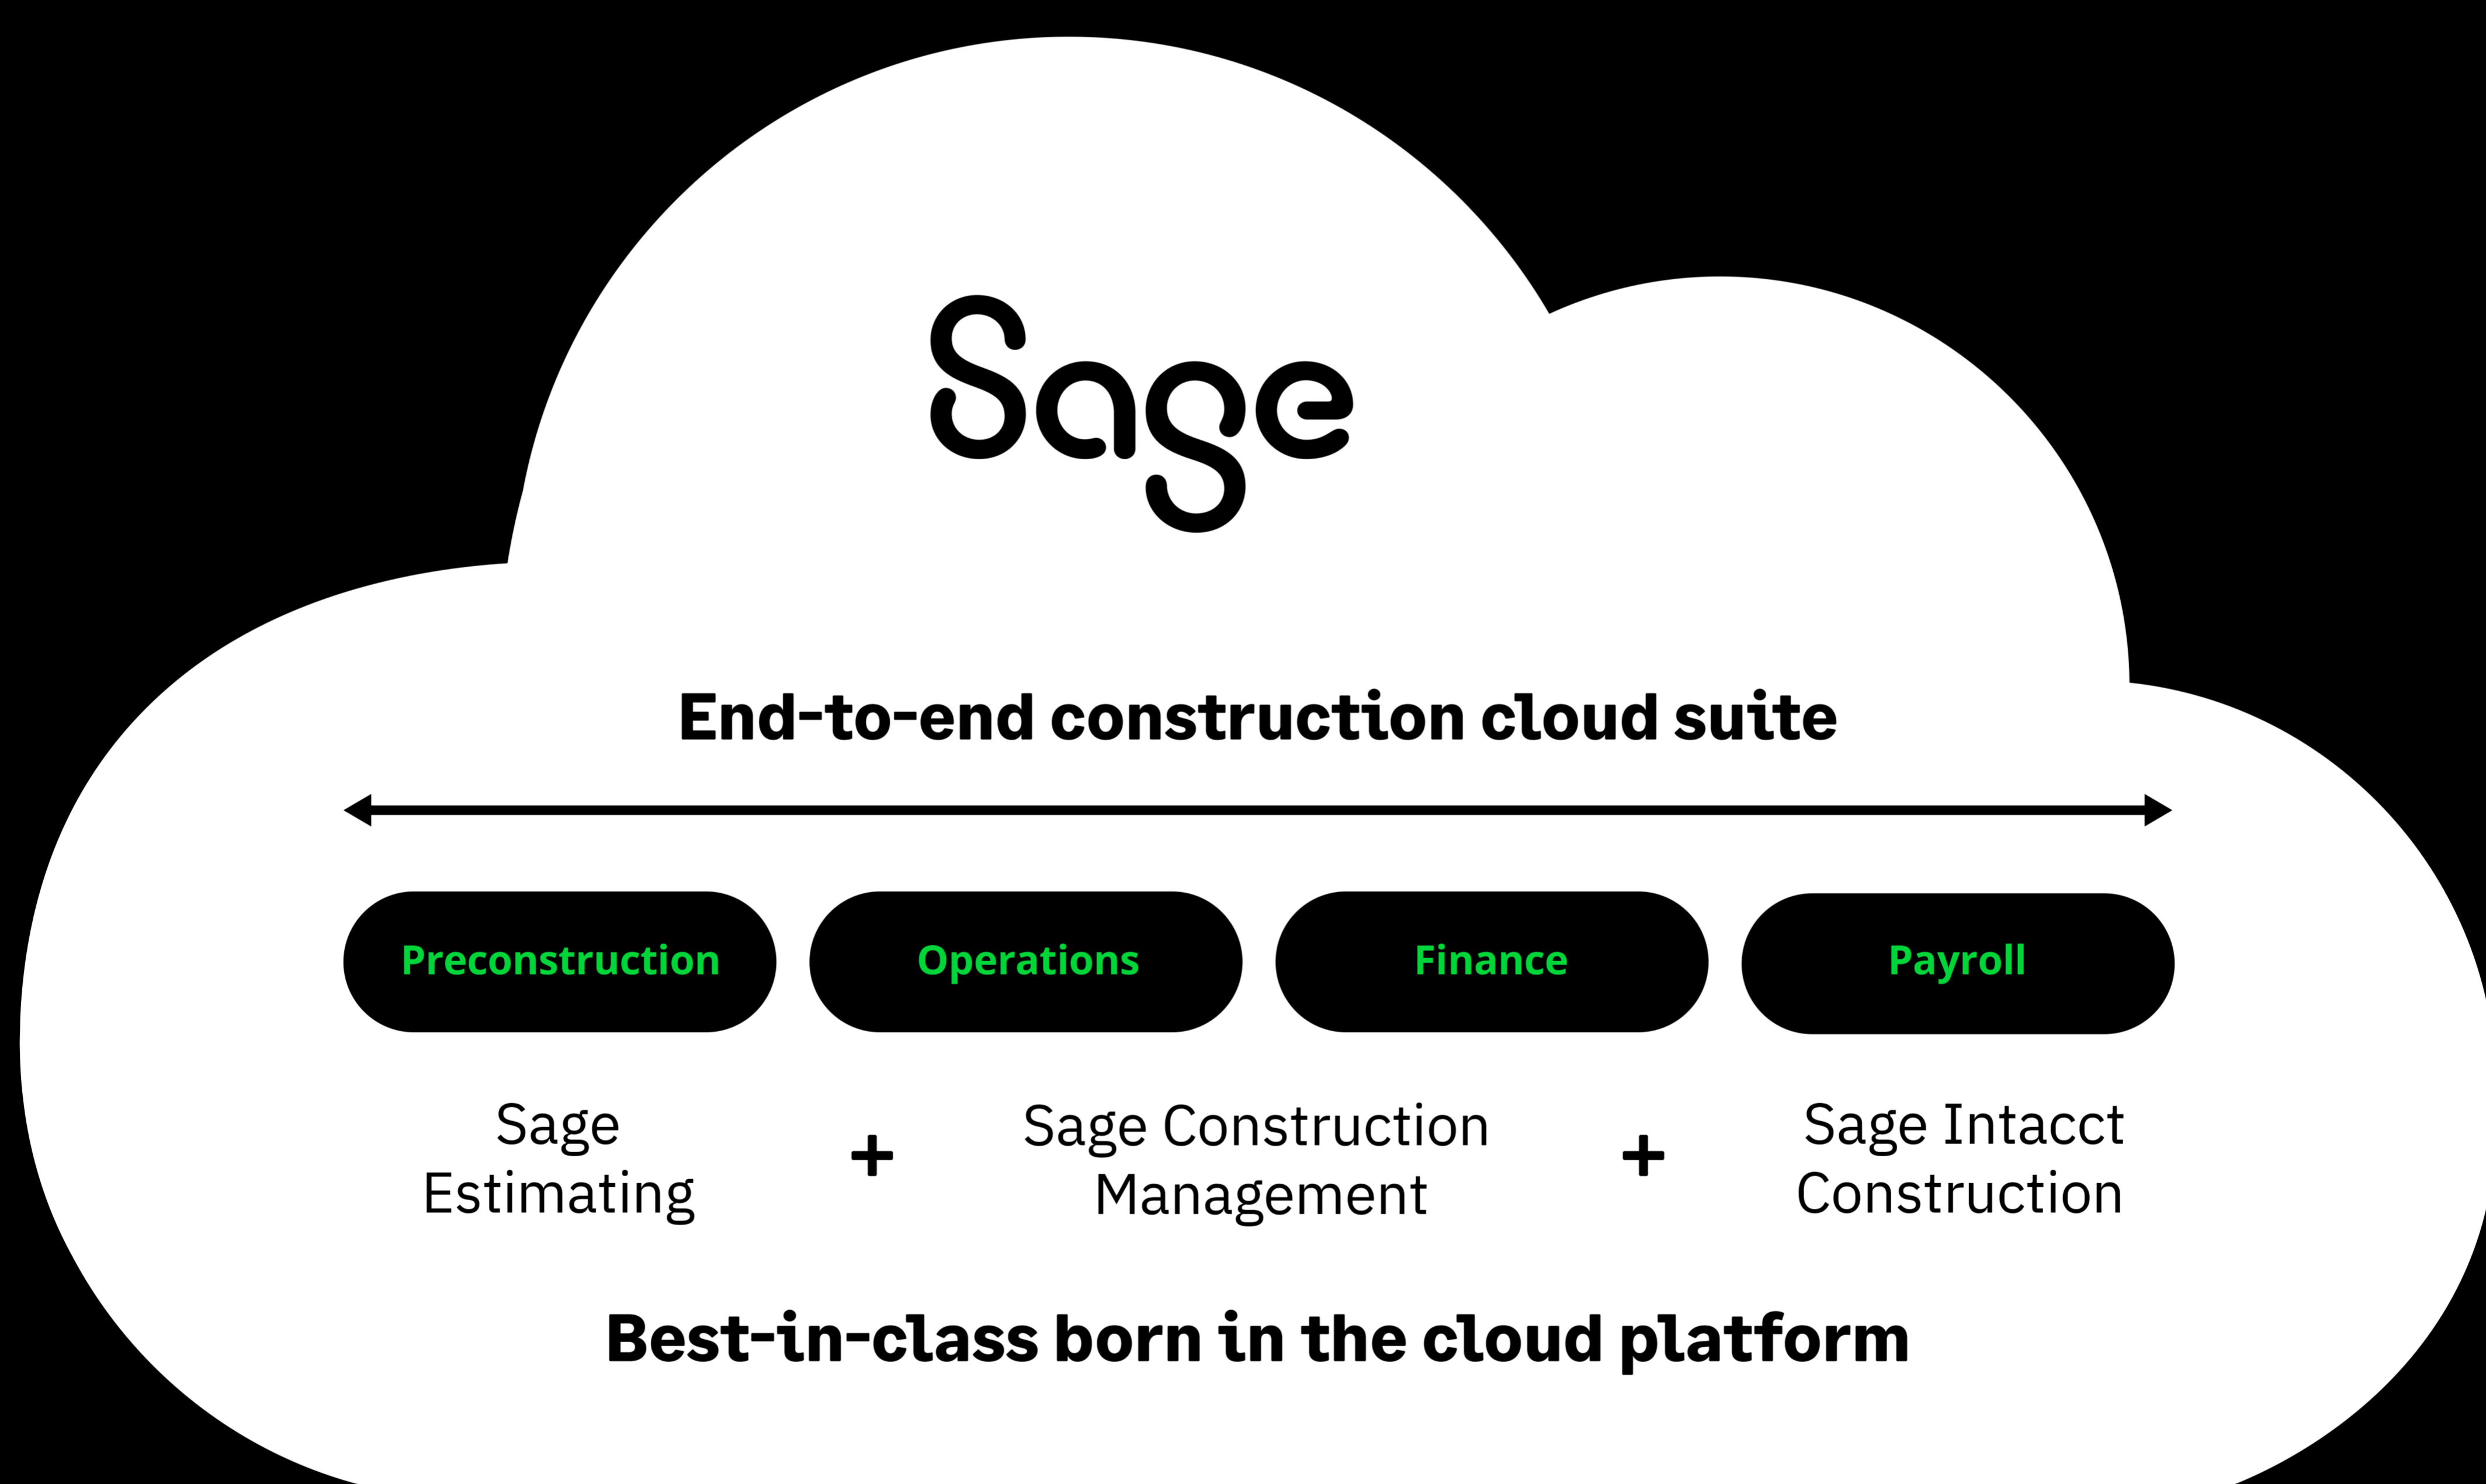

Digital connections and open APIs provide flexibility for construction companies that rely on a wide range of applications to run their business such as CRM tools, HR solutions, automated payment solutions, service management solutions, operational and preconstruction solutions, plus hundreds more through the Sage Intacct Marketplace.

Built to scale as your company grows

User and project volume can grow without impacting performance. Sage Intacct Construction provides the versatility and visibility to improve how your business is performing on each job with the integrations you need to work more efficiently and scale your business.

Cloud ROI

The benefits of cloud financial software can be transformative for your construction business. No more costly hardware maintenance and inefficient accounting processes. Many Sage customers have increased their profitability with on-demand job costing, advanced reporting, and automation.
