

Sage 100 ERP 2014 Intelligence Reporting Standard Reports

Get 15 ready-to-use reports that give you immediate insight into and across your business. Delivered in the familiar environment of Microsoft® Excel®, the reports are fully customizable, and flexible with drill-down capabilities. You can access them at any time or have them delivered, real-time, from your Sage 100 ERP software to Microsoft® Excel®, in the format of your choice. It's as simple as that

Report Name	Description	Business Benefits
Financial Reports		
Financial Report and Consolidated Financial Report	Powerful Financial Report and Consolidated Financial Report templates are available out of the box, offering 14 different report layouts to generate comparative balance sheets and/or income statements for any specified financial year, period, quarter , and budget. The layouts are automatically generated, grouped, and subtotalled by Sage 100 ERP account group. It is possible to drill down to the general ledger (GL) transaction details for any of these accounts. The Consolidated Financial Report supports multi-company consolidations. The report layouts are neatly presented and readily customizable in Excel, allowing users the ability to insert their own rows and columns, add their own formulas, customize account groupings, and format their layouts exactly as they wish to see them. These customizations can be saved for future use.	Time saving Saves you hours of manual manipulation each month by automating the month-end financial reporting processes. Enables faster, fact-based decision making based on the business essentials of cash flow, profitability, and growth. Allows for: - Real-time analysis of expenses and major streams of operating revenues of the company. - An up-to-date, automated snapshot of a company's assets, liabilities, and shareholders' equity in a presentable format, at any time, without the need for time-consuming manipulation of data in Excel. Accuracy Real-time data drawn directly from the source eliminates human error and provides you with trusted, secure, and up to date information in the familiar face of Excel. Ease of use Allows you to prepare financial statements for government compliance or bank loans easily. The financial information you require is now in one place, and you can easily customize the templates without a report consultant to present the reports in a professional manner. Flexible Provides you with the flexibility of offering different views of the data, depending on how you wish to have it presented or what you need to analyze. Comparative balance sheets and/or income statements can be generated for any specified financial year, period, quarter, and budget.

Report Name	Description	Business Benefits
Financial Report Designer and Consolidated Financial Report Designer Please Note: These reports require an active Report Designer site license.		
Financial Report Designer and Consolidated Financial Report Designer	This report generates a Report Designer-enabled workbook with raw financial data and enables use of the unique Report Designer interface launch from within Excel; this can then be used to transform the raw financial data into powerful report layouts. The drag-and-drop style interface makes it very simple to define new customized layouts with multi-level groupings. It also allows column- and page- level groupings by any field such as segments, companies, or regions. The Consolidated Financial Report Designer supports multi-company consolidation. Eight predefined layouts are provided with the Report Designer for the easy generation of customized income statements and balance sheets. Reporting Trees capabilities for powerful financial reporting and analytics across your business.	Report Designer enabled Gain access to the powerful and simple Report Designer software with this report. The Report Designer's "What-If Analyzer" feature can quickly simulate how your future scenarios may impact the bottom line, making it a useful scenario planning tool. Time saving Predefined financial layouts and calculations are real time-savers and eliminate the need for you to have an advanced understanding of Excel formulas and functions. Newly added accounts and updated data can be refreshed in existing financial report layouts at the click of a button. Ease of use You can quickly and easily be set up advanced financial reports, without having to rely on IT, to include meaningful aggregated prior, actual, and budget figures, providing you with invaluable detail for better decision making. Flexible Caters to segmented general ledgers, consolidations, and column-based reporting. View Your Organization Any Way You Choose At the click of a button, Reporting Trees allows you to model a reporting structure and view your organization in many different ways. Easily add or change reporting units without changing your financial data—accommodating reporting structures from simple to very sophisticated.

REPORT DESIGNER

Report Designer gives you the power to transform Microsoft® Excel® data in a raw spreadsheet format into a meaningful layout by using an intuitive drag and drop interface to construct the desired layout.

Sage Intelligence Reporting gets your real-time data securely and automatically into a Microsoft® Excel® spreadsheet, and the Report Designer gives you the ability to customize your layout in an instant.

Report Designer supports multi-level grouping down the left-hand side of a report up to 3 levels and provides total flexibility in choosing consolidations across multiple entities/companies. The Report Designer will automatically create all the Microsoft® Excel® formulae leaving you with a professionally presented report, formatted to your preference.

The 'What If Analyzer' function allows you to adjust a set of values and observe the impact it has on the data within your report layout, assisting with best/worst case scenario planning.

To generate an existing report layout or design your own, go to the BI Tools tab in Microsoft® Excel® and select 'Launch'. From there you can run, edit or design a new report layout. Alternatively select the 'Generate layout' button to quickly access existing Report Designer layouts.

If the BI tools tab is missing on your ribbon you will need to reactivate the 'BI Generator' Microsoft® Excel® add-in within Microsoft® Excel® options. For instructions, please view the Help within the Report Manager module, accessible via the menu bar. Please select Help > Help option on the menu and navigate to Report Designer > Troubleshooting > BI Tools Tab Missing in Microsoft Excel.

Once you have created your own custom Report Designer layouts you will need to 'Save Excel Template' using the Report Manager to save your changes for future use, please see Report Manager help for more information.

Report Designer Add-In

The Report Designer Add-In allows you to take full control of all the design aspects of your report layouts and take the complexity out of designing financial reports inside Microsoft Excel. While the Report Designer Add-In is installed separately, it enhances the Report Designer module.

The Report Designer Add-In allows you to break down a report into reusable pieces and then control where and how these pieces fit together to create a report. These pieces are Excel functions which communicate with a new In-Memory processing engine which will guarantee performance by being able to crunch financial numbers very quickly.

Reporting Trees can now also be used in conjunction with this Add-In, allowing you to capture your business's organizational hierarchy as a tree into the software and then specify account filter rules at each level.

The demonstration layouts that are made available include an Income Statement, Balance Sheet, Statement of Cash Flows and a Summary of Account Category

Easy drag & drop, flexible report design

Take full control of all design aspects of your financial reporting layouts and because you are using Excel, you can design it anyway you prefer and use all of Excel's standard functionality for formatting, rules and charts and more.

Enhance Performance

Enjoy a quick and responsive experience when designing and viewing financial reports.

Flexibility

Easily drag and drop pieces of your financial report into Excel, simplifying the ability to report of multiple years, budgets and multi-currency.

Report Name	Description	Business Benefits
Dashboard Report		
Dashboard Analysis	The Dashboard Analysis report template pulls information from the order entry module, giving you a one-page summary of key performance indicators featuring a financial analysis and “Top 5” Reporting on customers, items, and expenses. It contains both text and graphics to help with daily and long-term planning. In addition, comparative Profit and Loss figures are displayed for both the current month and year-to-date figures from the start of the current financial year. This report allows you to easily drill down to get further insights into the data.	Real-time Gives you a real-time overview of the overall health of your business at a glance. Consolidation of data Delivers critical information in one place to help you make better, faster, and smarter decisions - giving you a significant competitive advantage. Ease of Use You can generate reports at the click of a button – no copying, cutting and pasting of data from different sources. Ready for Distribution Your reports can be scheduled, published to the web, and shared via e-mail to relevant people in the business - putting critical information at their fingertips thereby improving collaboration and productivity. Flexible Reports can be customized to suit your unique business requirements, providing you with access to real-time business information, even across multiple companies, divisions, and databases, to improve your business decisions

Sales Reports		
Sales Master	Displays pertinent sales information including item sales quantities, costs and gross profits by customer and item. This report is run for a chosen date range and displays quantity sold, cost of goods sold, discount amount, gross profit amount, and gross profit percentage by customer and item. Similar to other reports, additional elements can be added to the PivotTable for further manipulation and analysis. There are two versions of this sales report, one pulling from the Order Entry module and one pulling from the Accounts Receivable module.	Comprehensive All your sales reporting requirements solved within one report. Flexible You have the flexibility to group data that is appropriate for your / your sales team requirements. The layouts can be dynamically changed on the fly in Microsoft® Excel® to view the same data in different ways, including graphically in trend charts, pie charts, bar graphs etc. These different views can then be saved for re-use. Powerful and Simple Gives you a comparative analysis using drag-and-drop functionality in PivotTables. E.g. comparing your sales regions side by side or analyzing sales performance by sales representative. Timesaving Gives selling time back to your sales team by allowing them to access this report on-demand and get up-to-date information immediately instead of relying on finance or IT or spending time manually collating and updating reports in Excel. It also allows the sales team to analyze buying behaviors, identify up- and cross-selling opportunities and spend more time chasing prospects.
